

MATTRESSES

Woundcare Pressure Sensitive Mattress

Contour Mattress with Safety Sides (Without cover)

## Mattress Specifications

### **Items marked with Asterisk have winged sides (Safety Mattresses)**

#### **(Mat-1) Wound Care PSM**

Features – Three layer foam construction with Memory Foam top layer (LR38-40), super high density medium firmness centre layer (HG39-140) and super high density firm feel base layer (ST35-200). This mattress also has high resilient extra firm side rails for ease of patient transfer (ST35-200).

All foams are of 35kg/m<sup>3</sup> or higher. The Wound Care PSM is designed for medium risk pressure care applications and has a load tolerance of 150kg. The cover is made with our extra supple “Two-Way Stretch”, vapour permeable, anti bacterial/anti-fungal and flame retardant fabric.

**Note. Wound Care PSM mattress is not available With Winged Sides.**

#### **(Mat-2) Ultra PSM**

Features - Three layer foam construction (Bottom layer MA29-200, middle layer ST30-130) with super soft Memory foam top layer (LR38-40) The cover is made with extra supple “Two-Way Stretch”, vapour permeable, anti-bacterial/anti-fungal and flame retardant fabric. A mattress designed for low medium risk pressure care applications. Load tolerance 120kg.

#### **\* (Mat-4) Ultra Safety PSM**

Features – Same Three layer foam construction with super soft Memory foam top layer and extra supple full “Two-Way Stretch” cover. The mattress has raised safety sides to prevent patient fallout.

#### **(Mat-3) Contour PSM**

Features - Two layer foam construction with convoluted top layer (MA24-120) and medium density base layer (23-130) One-Way Stretch cover. A mattress construction designed for low risk pressure care applications. Load Tolerance of 120kg The cover is made with extra supple “One-Way Stretch”, vapour permeable, anti bacterial/anti-fungal and flame retardant fabric.

#### **\* (Mat-5) Contour Safety PSM**

Features – Same two layer foam construction with convoluted top layer and One-Way Stretch cover. The mattress has raised safety sides to prevent patient fallout.
